

第 6506 號六十六百五千六第 日四念月十年寅戊緒光 HONGKONG, TUESDAY, DECEMBER 17th, 1878. 拜禮 號七十月二年亥 港香、 PRICE 324 PER MONTH.

CTION SALES TO-DAY

EXTRACTS.

THE CRY OF THE MADDEN SHARERHOLDERS.

The following appears in a Scotch newspaper:—  
"My dear Sir, I have a favor to ask of you. Will you please send me a copy of the 'Madden Sharerholders'?"  
"I have a favor to ask of you. Will you please send me a copy of the 'Madden Sharerholders'?"  
"I have a favor to ask of you. Will you please send me a copy of the 'Madden Sharerholders'?"

SHILLING WHIST.

I have little doubt that to be content with a shilling point, and to have half a crown on the table, is an advantage. I have a favor to ask of you. Will you please send me a copy of the 'Madden Sharerholders'?"

THE HIGHEST MOUNTAIN ASCENT.

A remarkable incident connected with Mr. Johnson's survey in 1855, is recorded in the 'Penny Mail'. During his journey to Knap, Mr. Johnson had visited three peaks of the Knap Lun range, which in default of local names, were marked on the map of the Knap Lun range as E 57, E 58, and E 61.

PROFITABLE RECREATION.

A little over a year ago, I visited a young lady in her town, on the invalid list, to read and care for a brood of chickens, and keep an account with them. I called on her, and requested to see the chickens. She showed me a brood of chickens, and I was much interested in them.

BAKING THE MONKS AT MALTA.

We drove to the Monastery of the Capuchins, vulgarly known to visitors in Malta as the place of the 'baked monks'. From the whole of the island, the monks of the Capuchin Monastery are first subjected to great heat and then to great cold, and are then subjected to great heat and then to great cold.

SCHOOL LIFE, PAST AND PRESENT.

The average pre-Arrol schoolmaster started with the axiom that the boy was a young wild beast by nature, and a matured liar by instinct. He treated him as such, and if he did not find him to be what he thought he was, he would not have been a schoolmaster.
